:: KAIROS **Recall of Earth** AIL-Exhibition

:: KAIROS. Recall of Earth addresses the relationship between humans and natural events. The term *kairos* relates to natural phenomena on the one hand and to temporality on the other – *kairos* is the modern Greek word for “weather”, but it also means “the right moment”. The ambiguity inherent in this word runs like a golden thread through the exhibition.

Starting out with meteorological aspects regarding the “weather”, the exhibition also tries to draw a picture of the psyche and its entanglement with natural phenomena. The boundaries between different levels of perception dissolve; the influence of the outside world becomes tangible and visible; the illusion of being able to control perceptions falls victim to deception itself.

The show explores the contribution of the abstract cosmic and the concrete terrestrial conception of space in relation to space/time, which can no longer be reduced to a philosophical-transcendental a priori as the still prevalent division of social contexts and nature, of bodies and the psyche needs to be called into question. The exhibition tries to trace possible dividing lines between geological and

human resources. Because, as Bruno Latour points out, “[...] the Terrestrial [...] is political, [...]; but it is not statist. It is, literally, atmospheric.”* Maybe ...

:: KAIROS **Recall of Earth** AIL–Symposium

A two-day symposium will be part of the exhibition project. Speakers will address philosophical and socio-cultural aspects (Gerald Bast, Alice Pechriggl, Ernst Strouhal), examples and ecological strategies (Thomas Zuna-Kratky) as well as meteorological (Marc Olefs) and psychoanalytical approaches (Eva Laquière-Waniek) – including discursive input from the arts (Mathias Kessler, Josefina Nelimarkka, Patrícia J. Reis, Ruth Schnell) and environmental psychology (Alexander G. Keul). The goal of the symposium will be to connect relevant socio-political issues with specific theoretic contributions as well as with artistic research processes.

Duration 19–20 Nov 2021

Location Main Hall @ AIL–Angewandte Innovation Lab, Georg-Coch-Platz 2 (former PSK), 1010 Vienna

Moderation Sophia Panteliadou, Rainer Kaltenberger
